

# Provocations for Thinking - Talking Tubs

## Open courses in 2017

A Talking Tub™ is a tool filled with a wide variety of object which encourage children to touch, feel and explore a theme. They are part of the Talking and Thinking Floorbooks Approach® as a child-led approach to planning which promote higher order thinking skills and raise attainment.

This course will explore some of the practical aspects of the floorbooks approach and is designed for practitioners who wish to purely focus on using talking tubs. Explore with us the way we involve encourage open discussion from the age of 0 to 12 years in developing their language and thinking skills whilst still being accountable to the curriculum.

### Aims:

- To explore the theory and practical application of developing your own talking tubs
- To support children in developing knowledge about the world around them
